Template 1 of 5 · IT-Resolve-Support-Ticket-v1_2026_10_15

Sample input (invented, masked)	Test settings
Test 1: User-1 cannot access the training portal.	[LANGUAGE]: English · [TONE]: Professional · [MAX_WORDS]: 60 · [FACTS]: IT-Facts-v1_2026_10_15

Test 1 · Prompt quality

Criterion	Evidence	Score
Role	Defines the role as an IT help desk agent drafting clear, professional employee replies.	1
Action	Lists the steps: identify the issue, find relevant facts, draft a reply, and flag unsupported answers.	1
Context	Uses [FACTS] to supply the IT Help Desk Facts.	1
Expectation	Specifies language, tone, maximum word count, and reply format.	1
Input and rules	Defines [INPUT_TEXT] and rules against inventing facts, promises, and repeating passwords or verification codes.	1
Total		**5/5**

Test 2 · Template quality

Criterion	Evidence	Score
Name and purpose	Template has a clear name, purpose, and use-when description.	1
Variables	Five variables are documented with types, allowed values, defaults, and missing-value handling. MAX_WORDS default corrected to 60.	1
Fixed safety rules	Rules limit replies to CONTEXT and prohibit unsupported claims and repetition of passwords or verification codes.	1
Tested	One test case is documented in this report. Additional test cases were run during template validation.	1
Safe examples	Example uses invented/masked data (User-1); no real password is included in this report.	1
Owner and version	Owner Wehad, version v1, and date 2026_10_15 are recorded.	1
Total		**6/6**

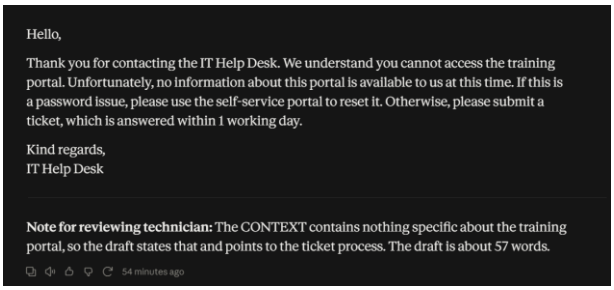

Test 3 · Output quality

Criterion	Evidence	Score
Facts supported and current	The reply flags that training-portal-specific information is unavailable and uses the self-service portal fact for password issues.	1
Numbers, dates and names exact	The reply does not introduce incorrect numbers, dates, or names.	1
No promises or actions	The reply does not claim that the issue was resolved or an action was completed.	1
No sensitive data repeated	The input contains no sensitive information, and none is repeated.	1
Complete and natural	The reply is professional, understandable, and flags the missing portal information.	1
Total		**5/5**

Test runs

Test 1 — Training portal access

Input: User-1 cannot access the training portal.

Status Approved

Template 2 of 5 · IT-Shorten-a-ticket-thread-v1_2026_10_15

Purpose: Summarize a long ticket thread in three lines for the next technician.

Sample input (invented, masked)	Test settings
Employee-1 cannot access the training portal. No error message or troubleshooting steps are mentioned.	[LANGUAGE]: English · [TONE]: Professional · [MAX_WORDS]: 60 · [FACTS]: IT Help Desk Facts (seven facts supplied in CONTEXT)

Test 1 · Prompt quality

Criterion	Evidence	Score
Role	Defines the role as an IT help desk assistant summarizing ticket threads for the next technician.	1
Action	Identifies the issue and relevant details, then summarizes the thread in exactly three lines.	1
Context	Provides the seven Internal IT Help Desk facts in CONTEXT.	1
Expectation	Specifies English, professional tone, a 60-word maximum, and exactly three output lines.	1
Input and rules	Provides the ticket thread as INPUT and rules against invented details, unsupported actions, and repeating passwords or verification codes.	1
Total		**5/5**

Test 2 · Template quality

Criterion	Evidence	Score
Name and purpose	Uses the task-specific name IT-Shorten-a-ticket-thread and states the three-line handoff purpose.	1
Variables	Documents the ticket-thread input, language, tone, maximum word count, and facts variables with defaults and missing-value handling.	1
Fixed safety rules	Requires factual summaries, protects passwords and verification codes, and forbids unsupported next-step suggestions.	1
Tested	One test case is documented in this report; the output was reviewed against the three-line summary requirement.	1
Safe example	Uses invented, masked data (Employee-1) and contains no real password or identifying information.	1
Owner and version	Record these in the template: Owner Wehad, Version v1, Date 2026_10_15.	1
Total		**6/6**

Test 3 · Output quality

Criterion	Evidence	Score
Facts supported and current	The output states the reported portal-access issue and identifies missing error details and troubleshooting information without inventing a cause.	1
Numbers, dates and names exact	The output adds no unsupported numbers, dates, or names.	1
No promises or actions	The output does not claim that troubleshooting or resolution has occurred.	1
No sensitive data repeated	The test input contains no password or verification code, and the output does not expose sensitive data.	1
Complete and natural	The summary is clear and professional, follows the three-line handoff format, and marks unsupported next steps as not specified.	1
Total		**5/5**

Test run

Test 1 — Training portal access

Input: Employee-1 cannot access the training portal. No error message or troubleshooting steps are mentioned.

Output:

Main issue: Employee-1 cannot access the training portal.

Important details and troubleshooting/status: No error message, troubleshooting steps, or outcomes are specified.

Summary for the next technician: Access to the training portal is reported as failing, with no further details provided. Next step: Not specified.

Result: The summary is factual and concise. Confirm that the saved template's final output formatting remains exactly three lines when tested.

Status: Approved

Template 3 of 5 · IT-Explain-it-simply-v1_2026_10_15

Purpose: Rewrite a technical answer in plain language for a non-technical employee.

Sample input (invented)	Test settings
Authentication failed because the credentials provided do not match the stored account information.	[LANGUAGE]: English · [TONE]: Professional · [MAX_WORDS]: 60 · [FACTS]: IT Help Desk Facts (seven facts supplied in CONTEXT)

Test 1 · Prompt quality

Criterion	Evidence	Score
Role	Defines the assistant as an IT help desk assistant who explains technical information in simple language for non-technical employees.	1
Action	Directs the assistant to identify the main meaning and rewrite the technical answer clearly without adding unsupported information.	1
Context	Includes the seven Internal IT Help Desk facts in CONTEXT.	1
Expectation	Specifies language, tone, a 60-word maximum, and a plain-language output without greeting or closing.	1
Input and rules	Defines the technical text input and rules to preserve meaning, avoid unsupported advice, and protect passwords and verification codes.	1
Total		**5/5**

Test 2 · Template quality

Criterion	Evidence	Score
Name and purpose	Uses a task-specific name and a purpose matching the task: rewrite a technical answer in plain language.	1
Variables	Documents the technical text, language, tone, word limit, and facts variables with allowed values and defaults.	1
Fixed safety rules	Requires meaning preservation, prohibits invented information, and prevents repeating passwords or verification codes.	1
Tested	One test case is documented in this report and the output was reviewed against the task requirements.	1
Safe example	The example uses a generic authentication message and contains no real personal data.	1
Owner and version	Template metadata specifies Owner Wehad, Version v1, and Date 2026_10_15.	1
Total		**6/6**

Test 3 · Output quality

Criterion	Evidence	Score
Facts supported and current	The output preserves the original message that the entered details do not match the account details.	1
Numbers, dates and names exact	The output adds no unsupported numbers, dates, or names.	1
No promises or actions	The output does not claim that a login issue was fixed or an action was completed.	1
No sensitive data repeated	The test input contains no password or verification code, and the output does not expose sensitive data.	1
Complete and natural	The wording is short, clear, and understandable for a non-technical employee.	1
Total		**5/5**

Test run

Test 1 — Simplify a technical answer

Input: Authentication failed because the credentials provided do not match the stored account information.

Output:

The system could not log you in because the details you entered do not match the details saved for your account.

Result: The output uses plain language and preserves the main meaning of the input without adding advice or next steps.

Status Approved

Template 4 of 5 · IT-Clean-a-ticket-before-pasting-v1_2026_10_15

Purpose: Replace identifying details in an IT support ticket with consistent codes before pasting it into an AI tool.

Sample input (invented)	Test settings
Sarah Ahmed (sarah.ahmed@example.com), username sahmed, reports that laptop device code LT-2048 cannot connect to the company network.	[LANGUAGE]: English · [TONE]: Professional · [MAX_WORDS]: 100 · [FACTS]: IT Help Desk Facts (seven facts supplied in CONTEXT)

Test 1 · Prompt quality

Criterion	Evidence	Score
Role	Defines the assistant as an IT help desk assistant preparing tickets for safer AI use.	1
Action	Directs the assistant to replace names, usernames, email addresses, and device codes with consistent codes.	1
Context	Provides the seven Internal IT Help Desk facts in CONTEXT.	1
Expectation	Specifies a cleaned ticket, a replacement summary, and a human-review note when needed.	1
Input and rules	Uses the ticket as INPUT and gives rules for consistent replacements, preserving technical meaning, and protecting secrets.	1
Total		5/5

Test 2 · Template quality

Criterion	Evidence	Score
Name and purpose	Uses the task-specific name IT-Clean-a-ticket-before-pasting and states its purpose.	1
Variables	Documents ticket text, language, tone, maximum word count, and facts variables with defaults and missing-value handling.	1
Fixed safety rules	Requires consistent replacement, forbids exposing original identifiers, and replaces passwords or verification codes with [REDACTED].	1
Tested	One test case is documented in this report and reviewed for identifier replacement and meaning preservation.	1
Safe example	Uses a sample ticket to demonstrate identifier replacement; no real account secret is included.	1
Owner and version	Record these in the template: Owner Wehad, Version v1, Date 2026_10_15.	1
Total		6/6

Test 3 · Output quality

Criterion	Evidence	Score
Facts supported and current	The output preserves the reported company-network connectivity issue without inventing a cause.	1
Numbers, dates and names exact	The identifying details are replaced with consistent codes; no new dates or facts are added.	1
No promises or actions	The output does not promise a fix or claim that troubleshooting has occurred.	1
No sensitive data repeated	The output does not repeat the original identifiers or expose passwords or verification codes.	1
Complete and natural	The output includes the cleaned ticket, replacement summary, and review note, though "username Username-1" is slightly repetitive.	1
Total		5/5

Input: Sarah Ahmed (sarah.ahmed@example.com), username sahmed, reports that laptop device code LT-2048 cannot connect to the company network.

Output:

1. Cleaned ticket

User-1 (Email-1), using Username-1, reports that Device-1 cannot connect to the company network.

2. Replacement summary

- User-1: name
- Email-1: email address
- Username-1: username
- Device-1: device code

3. Human-review note

None needed. All identifiers were clear, and no passwords, verification codes or other sensitive details appeared in the ticket.

Result: The output replaces the four identifier types with consistent codes, preserves the reported connectivity issue, and uses clear, natural wording in the cleaned ticket.

Status: Approved

Template 5 of 5 · IT-Fix-it-steps-v1_2026_10_15

Purpose: Turn a known fix into short numbered steps an employee can follow independently.

Sample input (invented)	Test settings
Issue: User-1 cannot access their account because they forgot their password. Known fix: Passwords must be reset through the self-service portal.	[LANGUAGE]: English · [TONE]: Professional · [MAX_WORDS]: 100 · [FACTS]: IT Help Desk Facts

Test 1 · Prompt quality

Criterion	Evidence	Score
Role	Defines the assistant as an IT help desk assistant explaining approved troubleshooting steps.	1
Action	Asks for a known fix to be converted into short numbered steps.	1
Context	Supplies the seven Internal IT Help Desk facts.	1
Expectation	Requests a short title, numbered steps, and a note if information is insufficient.	1
Input and rules	Provides the issue and known fix and prohibits invented details, unsupported actions, and disclosure of secrets.	1
Total		5/5

Test 2 · Template quality

Criterion	Evidence	Score
Name and purpose	The template name and purpose clearly describe the fix-it steps task.	1
Variables	The template defines issue, known fix, language, tone, word limit, and facts variables with handling for missing values.	1
Fixed safety rules	Rules prevent invented steps, unsupported follow-up suggestions, and disclosure of passwords or verification codes.	1
Tested	One documented test is included; the result was reviewed against the prompt rules.	1
Safe example	The template includes an example using the self-service portal and avoids exposing secrets.	1
Owner and version	Owner Wehad, version v1, and date 2026_10_15 are specified in the template.	1
Total		6/6

Test 3 · Output quality

Criterion	Evidence	Score
Facts supported and current	The steps are based on the stated self-service portal reset method.	1
Numbers, dates and names exact	The output uses the provided issue and does not add unsupported dates or identifiers.	1
No promises or actions	It does not claim the account was successfully restored or that the help desk reset it.	1
No sensitive data repeated	It does not reveal a password or verification code and warns the employee not to share them.	1
Complete and natural	The output includes a title, numbered steps, and a limitation note in clear, natural language.	1
Total		5/5

Input: User-1 cannot access their account because they forgot their password. Known fix: Passwords must be reset through the self-service portal.

Output:

Title: Resetting a Forgotten Password

1. Open the self-service portal.
2. Reset your password there.

Note: The available information is insufficient to provide further detail. It does not include the portal's location, the reset process, or what to expect afterward. This is the only approved reset method. Please do not share your password or any verification codes with anyone.

Result: The output provides short, numbered steps based on the known fix, avoids inventing detailed instructions, and includes an appropriate note about the limits of the supplied information.

Status: Approved
